Transition Crowd Based On Clip Name

```
string clips[] = point(0, "clipnames", @ptnum);
string target_clips[] = { "sit_idle_002", "n_sit_veryidle_002", "talking05", "talking04",
"talking02", "n_sit_idle_phone_01" };

foreach (string clip; clips) {
    if (find(target_clips, clip) >= 0) {
        i@trigger = 1;
        break;
    }
}
```
